

Raising the bar for utility cost recovery and conservation.

- Widest selection of wireless utility submetering products
- Turnkey solutions for every environment
- Technical innovation and intelligent design
- Longer warranty than traditional submetering AMR systems.

Your partner for advanced submetering solutions of every kind and for every environment.

Tehama Wireless manufactures the widest variety of Automated Meter Reading (AMR) equipment for Multifamily, Commercial, and Manufactured Home Properties. Our industry leading five-year warranty is evidence of our commitment to providing you the best possible solutions, products and support.

Reduce installation time and increase net operating income with our easy-to install submetering systems, which feature license-free 900 MHz radio technology, 5+ or 10+ year battery life and the widest temperature range for maximum durability in every environment.

Tehama Wireless MDTs and repeaters are available in MAX Range and LoRaWAN models, allowing RF signals to travel three-to-four times as far as standard range devices, requiring fewer repeaters and less installation time.

Metering Data Transceivers (MDTs)

Choose from the industry's largest selection of automated MDTs, which monitor nearly all water, gas, and electric meters and relay those readings to the DCAP. All are available in Standard, MAX, and LoRaWAN range versions.

Data Collectors - DCAPs and Gateways

Data collectors manage the AMR network by capturing and storing data from all of the meters via the MDTs. Using internet connection, WiFi link, or cellular connection, the data collector automatically uploads all the meter reading data directly via email, FTP, or an API.

Repeaters

Repeaters extend the range of the AMR network to provide coverage to large and RF challenged sites. Our popular Solar Repeater Kit includes a Repeater, solar panel, battery, controller, enclosure, and pole mounting hardware. Repeaters are available in both Standard and Max range models to suit various coverage needs.

Configuration Software

Our Web App, Mobile App and Configuration, Installation and Troubleshooting (CIT) software provide an easy-to-use interface to configure the data collector. In addition to the ability to monitor each unit, they include built-in troubleshooting tools to identify potential issues and ensure your system is performing optimally.

Why Tehama Wireless?

Innovative Technology

Tehama Wireless submetering solutions utilize 900 MHz radio technology to meet diverse requirements. Our solar-powered and submersible systems offer extended range and reliable data transmission, allowing property managers to efficiently monitor and manage utility usage across large areas.

Sustainable Solutions

Tehama Wireless is committed to promoting sustainability in utility management. Our solutions empower property stakeholders to identify inefficiencies, drive down costs, and encourage responsible consumption of resources for a greener future.

Quality and Reliability

Our submetering solutions are "Made in the USA", ensuring unparalleled quality and reliability due to strict regulations and quality standards. This commitment translates to durable and dependable devices.

Premium Customer Support

We are dedicated to providing personalized customer support, ensuring that you and your team are kept up-to-date with our innovative submetering products and solutions.

Cutting-edge Customization

Our in-house engineering expertise supports customized, customer-driven products, alongside the capability to create value-added features.

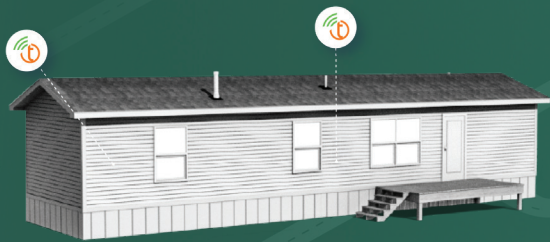

Smarter Product Design

Fewer components and the simplest, most cost-effective installation help you reduce costs. Built-in software tools simplify troubleshooting and eliminate unnecessary and costly site visits.

How Tehama Wireless Works

About Tehama Wireless

Keep it Simple and Human

Tehama Wireless was founded in 2003 and our core engineering team has worked together for more than 30 years. With the industry's widest selection of wireless utility submetering products, all of which are made entirely in the United States, our product line continues to grow to meet the changing needs of our multifamily and commercial real estate customers.

Continually improving upon our motto to "keep it simple and human" we hold a deeply ingrained philosophy of smart product design and a commitment to providing the best possible support and training for our customers, distributors and partners. Today, Tehama products are in use across millions of residential units, campus facilities, manufactured homes and commercial and landscaping operations.
